

## Cockroach Treatment Preparation Sheet (Commercial)

In cockroach control, sanitation is **EVERYTHING**. Proper control does not come without it. The following steps must be taken for optimal results. This list is not all inclusive. Remember, if something can be cleaned, clean it!

### Items To Be Completed Prior To Our Arrival:

- € Cover or remove open food, napkins, cups, silverware, plates, utensils, pans, etc. from the treatment area. Remove boxes stored directly on the floor. Remove or discard outdated merchandise.
  - Some Helpful Hints:
    - Put items in coolers if there is room.
    - Put items on the dining room tables (after cleaning off tables) and cover with linens.
    - Put items in boxes or plastic tubs and cover with plastic wrap.
- € Cover ice chests, fryers and open tubs.
- € **Do not** cover open storage shelves as these will all require inspection and/or treatment.
- € Shut off exhaust hoods and fans.
- € Clean all dining areas, food prep surfaces, sink drains, floor drains, trash containers, recycling bins, sump pumps, refrigeration drip pans, garbage disposals.
- € Clean kitchen, including counters, floors, stoves, range hoods, food prep surfaces, dishwasher(s). **(Before & After Service)** Clean behind and underneath kitchen equipment and shelving **(Before Service Only, Unless Noted Otherwise)**.
- € Bathroom cabinets and under sinks should be cleaned. Wash cabinets inside and out, wipe out drawers, clean sinks, inside and outside of toilets and scrub bathroom floors.
- € Repair leaky beverage dispensers, damaged flooring, plumbing or sewage leaks (if applicable).
- € Seal or caulk holes in walls/around utility lines, cracks and crevices (if applicable).
- € Vacuum all carpets (if applicable).

### After Treatment Is Complete:

- € No person(s) can re-enter the premises for at least **4 hours** unless specified otherwise.
- € Run exhaust systems.
- € All open food, napkins, take out boxes etc, missed must be destroyed.
- € All cups, silverware, plates, pans, etc. missed must be washed before re-use.
- € Thoroughly wash grills, cutting boards and food prep surfaces prior to re-use.
- € Thoroughly wash all exposed eating surfaces (including tables and bars). Do not wash any treated surfaces such as baseboards.
- € It is normal to see roaches for several days after the treatment. It may take several days for roaches hiding in inaccessible areas to contact treated surfaces. After 2-3 weeks, the premises should be re-treated. Further treatments may be necessary. There is a 30-day warranty from the time of the re-treatment (only if sanitation recommendations were followed and the re-treatment was performed 2-3 weeks after the initial.)
